

Dublin, November 18. 1882.

Dear Mr Chapman

Maria Miller from Apple Hill,  
Mississauga, Ontario, Canada, and we are  
also, and we have purchased additional numbers the  
very first time. We have had them for about  
one year now.

at his Board & paper & food. heat of  
money given for Anti Slavery purpose,  
it is, like to keep them & the rest of population  
but to take less to do as much good and  
as little harm as can be contrived.

Now I wish Mr. May to say that  
I know and am sure that there is not  
any substantial ground for fearing any  
written or secret between the British  
and the French. We could not  
wishes. We only could it be if the  
Europeans to change their or the  
~~Hottentot~~ leopard his spots. We are  
more lawless and the British & French  
are only purple strangers. S. W. Alexander  
of tomorrow the contrary to prevent  
to when that good can really come out  
of justice. I could not then change my  
which evidently to us became a cardinal  
error to speak us friends with purple strangers.  
I think this same might be said by all others  
in their countries who cordially freely coope-  
rate with H. C. White, Briton. Unless our  
numbers are very small, and I am increasingly  
of opinion that the best they can do is  
to assist the true when in America by  
all the means in our power.

Edmund Quincy tells me that your sister Anna  
was very much gratified with an extract  
from a letter from Penn to help either which

appeared in a late Advocate respecting the efforts  
making in France for the British Bazaar. This  
extract was printed after consulting Mr. Webb &  
and Subscribers who names, under the impression  
which we both had that with this subscription, it  
was intended for the encouragement of domestic  
fust Britain. If this bill had been as referred to  
the House I could not have printed a line from  
it without being asked from the author - but Mr.  
I. thought and so did, that no possible harm  
could follow from the mere statement of facts.  
I knew his particular eas & family, an absent their  
names being brought forward, and the names  
were left out in the extract.

I frequently hear from Miss Ellin. Her father  
appears to be in excellent spirits. She enjoys life  
as much as most healthy people do  
I hear as much as most healthy people do  
but she who are in possession of perfect health,  
I am sorry to say her sister C. has such trouble  
about the Recommittee, and an anxious whetever  
it might be out of such consideration to  
her that she need fatigue herself in any way  
respecting it

Parker Pillsbury is with us now and seems  
to be as well as I have ever seen him. I heard  
him make a speech for the first time last night  
at a temperance meeting - and a very able &  
impassion speaker he is

We are all well and with the exception  
of my brother as you know our whole family  
at home - with several other relatives besides  
our friend Pillsbury Yours truly

Ruth J. Webb

My chief regret tho' English Upper Class since 1848  
has been that after so much time & trouble  
any despatch against any assertions of popular  
rights that might however remuneratively credit &  
endanger their own position, & the ruling  
class in Great Britain

Madame Sophie  
Léonie de Herlanc.
